

Jaagrav Seal

Detail oriented professional with 4+ years of extensive experience as a Full Stack / iOS Engineer focused on building high quality products and digital experiences

Relevant Experience

iOS/macOS Engineer, **Mili** Apr 2025 — Present

- Owning iOS and macOS app in organisation
- Working with SwiftUI, native iOS/macOS frameworks like Live activities, AVFoundation, etc.
- Added self update feature for pkg version of app
- Building macOS menu-bar app

Software Engineer Intern, **Atlan** Sep 2022 — Mar 2025

Product Engineer Intern Sep 2022 — Oct 2023

- Deliver high-quality, robust production code for a diverse array of projects for clients including NASDAQ, Amazon, Netflix, Postman, Algolia, and more.
- Built the Google Sheets Addon for Atlan from scratch that allows data analysts to pull in column and lineage metadata for enrichment.
- Wrote foundation code for Atlan's Github dbt Action that allows data engineers to easily see the downstream impact when they make changes to dbt models on Github.
- Worked on Atlan AI: A pack of multiple Generative AI experiences developed for writing SQL code, enriching metadata, copilot chat, search assets across multiple data sources using Microsoft Azure OpenAI, Python, Langchain, and FastAPI.
- Worked on multiple aspects of the product using Vue3, TypeScript, AppsScript, Office.JS, Microsoft Azure, Google Cloud, Postgres, Python, Golang, FastAPI, Ant Design, TailwindCSS, Monaco Editor, and a lot more.

Frontend Engineer Intern, **Social3** Jun — Aug 2022

- Led the front end team
- Migrated from ReactJS to NextJS styled with MaterialUI, TailwindCSS, and more
- Developed referral and verification mechanisms along with web3 based libraries
- Set up Lens Protocol feed

Software Engineer L2 Intern, **CuriousJr** Oct 2021 — May 2022

Software Engineer L1 Intern Aug — Oct 2021

- Designed and coded courses using Google's No Code Library Blockly. Used 2D game and physics engines like P2 and Phaser to write graphically optimized games for students to make as a part of the courses I designed.
- Mentored 5 interns, working on JS courses and blockly courses

Frontend OpenSource Contributor, **Design & Code** May 2021 — Jan 2022

Contributed to the Branding Website, Poler, Cordion, IndiCov

- Worked with technologies like React, NextJS, Firebase, MaterialUI, DraftJS, React Beautiful Drag and Drop, and more. Poler is a React based PWA where people can easily create polls and share it with their friends. The results get updated in real-time. It uses Firebase in order to register and count polls.
- Cordion is a web app created in order to help you create and edit notes. It features a built in text editor to store your notes in a more organized and attractive manner.
- IndiCov, winner of HackAtHome2 hackathon, it was a platform that worked towards helping patients during the COVID19 pandemic by informing and constantly updating them of the available resources.
